

## Higher Corn Yields & Speed to Market

Using ULTRA the corn fills out 18 rows around and 44 long. **The two extra rows adds 27 bushels per acre!**

Amazingly this 112 day corn had filled by day 90. A phenomena that is seen consistently when using ULTRA. Early ripening is a real bonus for farmers, shortening the growing time by up to 22 days.

### Corn Bushels Per Acre 2018

Real time data from Williams Research Farm

This represents a **40.13%** increase over State average and a **25.63%** increase over U.S. average.

At \$4 per bushel (Dec 2018 Agfax) this represents an increase of \$286/\$204 per acre respectively.

Typical ROI \$273/\$191 per acre!  
That is >140% return (over US Ave)\*

HEALTHIER PLANTS  
HEALTHIER PLANET

### OUR MISSION:

Using Nature's technology, to produce Natural Biostimulant Products that aid farm sustainability by yielding healthier harvests and reducing water and chemical usage.

**ULTRA BIO GREEN**  
NATURAL PLANT BIOSTIMULANT

*Corn Highlights*

**Better for Farmers.  
Better for Consumers.  
Better for the Planet.**

# ULTRA BIO GREEN

## HOW ULTRA WORKS

**ULTRA** Bio Green is a cation exchange stimulant at the cellular level to improve the health and maturity of plants.

**ULTRA** Bio Green quickly speeds the nutrient transport and effectively carries natural nutrients throughout the plants circulatory systems.

**ULTRA** Bio Green can be used on all plants, and is ideal for improving the growth of lawn grass, row crops, flowers, fruit trees, vineyards, and landscape plants.

## HIGHLIGHTS

- Earlier to Ripening
- Increased Sugar Production
- Reduce Disease Pressure
- More Even Ripening
- Greater Crop Yields
- increased Photosynthesis
- Speeds Nutrient Uptake into Plants
- Natural Pesticide / Fungicidal Properties
- Super Surfactant
- Excellent Anti-Drift Aid

## ULTRA Bio Green FORMULATION

ULTRA Bio Green is a unique formulation synthesized by *Richland Enviro Solutions*. This biostimulant is not commercially available. We add a full complement of bioavailable minerals, a complex of vitamins and essential plant oils and extracts to enhance growth and health of plants.

The formulation also enriches soil & soil bacteria, increases the CEC and Organic Carbon content, conditions the soil matrix increasing moisture retention and reducing leaching so benefits are year after year.

## KEY BENEFITS OF ULTRA BIO GREEN

- Increased absorption of foliar feed
- Increased ability for soil to retain moisture
- Increased metabolism
- Bigger stronger plants
- Increased CEC (Cation Exchange Capacity)
- Large roots
- Better nutrient exchange
- Reduced agrochemical inputs
- Bigger more consistent yields
- Increased fertility
- Protects against pests & diseases
- Able to withstand adverse weather
- Higher BRIX (sugar levels) - better taste
- Recovery from chemical/physical damage
- Increased positive microbial action in soil
- Speeds nutrient uptake into plants

## NATURAL GROWTH BIOSTIMULANT

### *A NATURAL FORMULA*

## ULTRA ingredients

- ULTRA is derived from plant extracts and oils
- Fulvic acid: Increases Cation Exchange Capacity
- Naturally sourced minerals (nutrients)
- Vitamins
- Molasses: A source of energy and carbon
- Natural Surfactant: Spreader/Stickier super translocator for nutrients and moisture

## ULTRA USAGE

**ULTRA** is powerful and easy to use and apply. Just add 1 oz of ULTRA to 1 gal. of water in a handsprayer. For use on row crops, add 8 oz. per acre mixed with water. ULTRA also will tank mix with most herbicides, insecticides, fungicides, and foliar fertilizers.

If you have hard water, you need to add water solution to aid mixing. Application is the same on all crops. Getting ULTRA on plants at an early stage of growth to get max root growth and set the stage for healthier plants is essential.
