

ULTRA BIO GREEN

A TRUE GREEN BIOSTIMULANT

“PRESERVES THE ENVIRONMENT FOR ALL”

- 1 - Save Money on Inputs
- 2 - Increase Yields & Quality
- 3 - Improve Overall Plant Health

ULTRA Bio Green FORMULATION

ULTRA Bio Green is a unique formulation synthesized by *Richland Enviro Solutions*. This biostimulant is not commercially available. We add a full complement of bioavailable minerals, a complex of vitamins and essential plant oils and extracts to enhance growth and health of plants.

The formulation also enriches soil & soil bacteria, increases the CEC and Organic Carbon content, conditions the soil matrix increasing moisture retention and reducing leaching so benefits are year after year.

HEALTHIER PLANTS
HEALTHIER PLANET

OUR MISSION:

Using Nature's technology, to produce Natural Biostimulant Products that aid farm sustainability by yielding healthier harvests and reducing water and chemical usage.

ULTRA BIO GREEN
NATURAL PLANT BIOSTIMULANT

VINEYARDS & GRAPES

*Better for Farmers. Better for Consumers.
Better for the Planet.*

ULTRA BIO GREEN

HOW ULTRA WORKS

ULTRA Bio Green is a cation exchange stimulant at the cellular level to improve the health and maturity of plants.

ULTRA Bio Green quickly speeds the nutrient transport and effectively carries natural nutrients throughout the plants circulatory systems.

ULTRA Bio Green can be used on all varieties, and is ideal for improving the growth of plants, grass, row crops, flowers, fruit trees, vineyards, and landscape plants.

KEY BENEFITS OF ULTRA BIO GREEN

VINEYARDS

- Earlier to Ripening
- Increased Brix (Sugar) Production
- Reduced Disease Pressure
- More Even Ripening
- Larger Yields
- Increased Photosynthesis
- Speeds Nutrient Uptake into Plants
- Natural Pesticide / Fungicidal Properties
- Adds Vigor and overall Health

NATURAL GROWTH BIOSTIMULANT

NATURAL FORMULA

ULTRA INGREDIENTS

Oleic Acid 20%

Glycolipids 12.5%

Sugars 12%

Natural Surfactant 8.5%

Plant Extracts & Oils 7%

Fulvic Acid 0.5%

ULTRA USAGE FOR *WINE AND GRAPES*

1 - As vines start out of dormancy mix **1 oz ULTRA to 1 gallon** of water and apply 2 to 4 gallons of water to the base of vine trunk - one application.

2 - AFTER Leaf stage has formed mix **1/2 oz of ULTRA to 1 gallon** of water and apply by spray to foliage **every 3 weeks** until bloom stage.

3 - When Grapes have set mix **1/2 oz of ULTRA to 1 gallon** of water and spray foliage once.
